

Asido

Get the Asido Edge for Your Sweet Potato Crop.

“

I'm excited about what I'm seeing with the consistency of the NTEXX EDGE product over the past two years in improving our crop yield.

”

– Macon LaFoe Sr., Grower,
Oak Ridge, LA

Decades of data from research and field testing provide a clear picture: Asido's multi-strain microbial solutions are time-tested to deliver an 87 percent win rate over control plots. Our superior microbials lend a hand at every step of sweet potato production. Robust germination, dynamic root development and a more uniform harvest lead to higher returns.

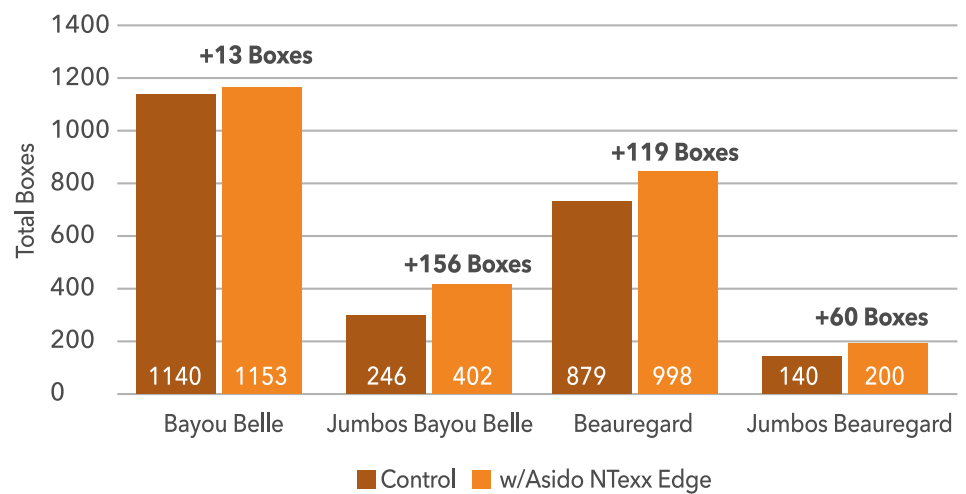

Easy application.

- Add Asido's microbial solutions to your existing formulation.
- Apply 2-4 quarts/acre of NTEXX Edge at planting.

More boxes to the acre.

Our proven biologicals consistently outperform control plots in university trials. Depending on the sweet potato variety, Asido increased both jumbos and total market yields.

2023 LSU SWEET POTATO TRIALS

Add Asido Biologicals to your current treatment plan to reap the rewards of our proven superior microbial solutions.
